

DIRECTIONS ON HOW TO USE THE KILL-A-WATT TEST METER

1. Unplug the appliance to be tested
2. Plug the Kill-A-Watt test meter into the 110V receptacle
3. Plug the appliance into the Kill-A-Watt meter
4. Meter the appliance for a 24 hour or 7 day period
5. Record reading BEFORE unplugging the Kill-A-Watt test meter or reading will be lost

I _____, a member of Coles Moultrie Electric Cooperative, understand this device is the property of the cooperative and am responsible for this Kill-A-Watt test meter. If this Kill-A-Watt test meter is not returned within 60 days or damaged in any way, the current replacement cost for this device will be added to my current CMEC electric bill.
